Contrail is a project managed by the Contrail consortium. Contrail is partially funded by the FP7 Programme of the European Commission under Grant Agreement FP7-ICT-257438.

The Contrail project aims to design, implement, evaluate and promote an open source computational cloud wherein users can limitlessly share resources. Contrail will provide a complete cloud platform which integrates a full Infrastructure-as-a-Service and Platform-as-a-Service offer, Contrail will allow cloud providers to seamlessly integrate resources from other clouds with their own infrastructure, Contrail will break the current customer lock-in situation by allowing live application migration from one cloud to another, Contrail will be fully available in open-source.

The Contrail project is supported by funding under the Seventh Framework Programme of the European Commission: ICT, Internet of Services Software and Virtualization. GA nr.: FP7-ICT-257438.
